

SIMPY KUMARI

Prayagraj, UP, India · simpysingh214@gmail.com

[LinkedIn](#) · [GitHub](#) · [LeetCode](#)

Summary

Detail-oriented Full Stack Developer and Pre-final year B.Tech CS student (Graduating 2027, UCER) with proven experience building production-ready web applications using JavaScript, React.js, Python, and REST APIs. Delivered impactful projects including a cloud-optimized image vault (100,000+ images, Cloudinary) and a Top 10 hackathon-winning budgeting tool. Certified by IBM, INFOSYS, JPMorgan, and Tata. Passionate about privacy-first, resource-efficient software engineering.

Professional Experience

Full Stack Development Intern | IBM Virtual Internship

Jan 2025 – Apr 2025

- Architected a full-stack Weather App with React frontend + live REST APIs, achieving <200ms response rendering across 5+ weather parameters.
- Applied responsive CSS Grid/Flexbox layouts eliminating layout breakage across 4+ screen sizes; followed MVC principles and wrote technical documentation.
- Handled asynchronous JS (Promises, async/await), JSON parsing, and graceful error states, strengthening production-readiness of the application.

Core Java Intern | United College of Engineering & Research, Prayagraj

Aug 2024

- Completed 60 hours of intensive Summer Training on Core Java with Collections, covering OOP principles, data structures, generics, and the Java Collections Framework.
- Built hands-on projects applying ArrayList, HashMap, LinkedList, and TreeMap to solve real-world data management problems, strengthening DSA implementation skills in Java.
- Certified by United Global Infoservice Pvt. Ltd. in collaboration with UCER, Prayagraj.

Technical Projects

TinyGallery — Smart Storage Vault | HTML5, CSS3, Vanilla JS, Cloudinary API

[Link](#)

- **Privacy:** Implemented Client-Side Data Isolation using LocalStorage, ensuring each user's gallery remains private and local to their device.
- **Security:** Engineered a User-Defined Personal PIN System for authenticated uploads and secure access resets.
- **Optimization:** Built a JS Compression Engine that shrinks images to ~200KB, enabling 100,000+ images in a 25GB Cloudinary vault.

BudgetBuddy — Smart Budgeting Tool | HTML5, CSS3, JavaScript

HackQuest '25 – Top 10

- Engineered a financial tracking tool that secured a Top 10 position among 100+ competing teams.
- Designed a user-centric interface to simplify financial tracking with intuitive expense categorization.

Weather App | HTML5, CSS3, JavaScript, REST APIs

[Link](#)

- Developed a responsive Weather Application integrating external APIs for real-time data delivery.
- Applied UI/UX principles to ensure cross-device compatibility and handled asynchronous API requests.

Education

B.Tech — Computer Science & Engineering

2023 – 2027

United College of Engineering and Research (UCER), Prayagraj

Coursework: DSA, OOPs, DBMS, OS, Computer Networks, Software Engineering, Compiler Design

Technical Skills

Languages: Python, C++, JavaScript (ES6+), HTML5, CSS3

Frontend / Backend: React.js, Node.js, REST APIs, Asynchronous JS, Fetch API, DOM Manipulation

Cloud & Tools: Google Cloud Platform (GCP), Cloud Dataproc, Cloud Dataflow, Cloudinary API, Git, GitHub, Power BI

CS Fundamentals: DSA, OOPs, DBMS, OS, Computer Networks, Software Engineering, Prompt Engineering

Certifications & Achievements

Certifications: Tata Data Visualization, JPMorgan Software Engineering, Deloitte Data Analytics, IBM Internship, INFOSYS AI Primer, INFOSYS Prompt Engineering, Python, Core Java Collections

Cloud: Google Cloud Skills Boost — hands-on labs in Cloud Dataproc & Dataflow

Competitive: HackQuest '25 Top 10 Finalist (100+ teams) · LeetCode: 75+ problems (Arrays & Strings)

Workshop: IEEE UCER Student Branch IoT, NLP, Power BI & Full Stack Development (Dec 2024)
